

SNUG WIRING CENTRE

OVERVIEW

The Snug 9-zone Wiring Centre is designed to connect all the elements of an underfloor heating system. The compact unit includes cable clips and wall fittings.

FEATURES & BENEFITS

- Extra large terminals for the connection of the electronic heads allow control of up to 18 circuits
- Connections for boiler, pump and programmers included
- LED lights indicate when zones are energised

SPECIFICATIONS

Supply voltage:	230V AC, 50/60Hz
Number of zone outputs for thermal actuators:	9
Maximum number of actuators per zone:	2
Zone outputs, voltage:	230V AC
Zone outputs, maximum rating:	2.3W
Maximum ambient temperature:	50°C
Protection class:	IP53

STANDARDS

EN61000-6-3:2007+A1:2011
 EN61000-6-1:2007
 EN62208:2011
 EMC Directive 2004/108/EC Annex II
 LVD Directive 2006/95/EC
 CE Marked

DIMENSIONS

All dimensions in mm unless otherwise stated.
